

Zodiac Constellation Activity Chart

The signs of the zodiac come from the constellations through which the Sun passes during the year. Each day, the Sun is in front of a particular zodiac constellation that is always present but invisible to our view because the Sun is so bright. Complete the constellation connect-the-dots. Then cut out the dial  and pin it with a paper fastener to the  on the chart. Reveal the unseen sky today!

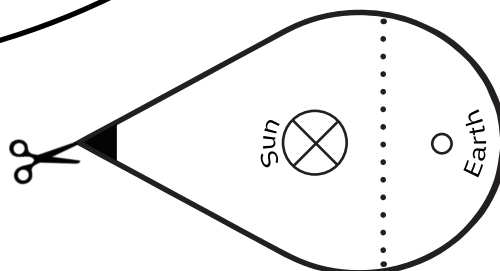

The selected date and its zodiac constellation

The constellations that may be seen in the night sky on that date

This chart may seem unusual; you may find that your zodiac sign is different than what you've been told. This is not an astrological chart. It's an *astronomical* chart. It shows exactly what is observed in the sky. It shows your zodiac constellation. For more info, see bit.ly/3GvXYky.

(Sun and Earth not to scale)
